

Young Innovators

We are young innovators learning valuable 21st Century Skills and developing strong character as we participate in BEST Robotics. There is something for everyone, students and adults alike. So come join us and have fun and excitement while making new friends.

Our 2012 team photo:

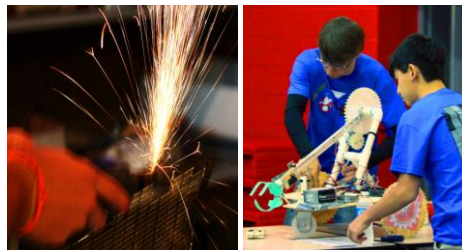

BEST Robotics

Boosting **E**ngineering, **S**cience, and **T**echnology

We compete in BEST Robotics tournaments as a co-ed team of home-schooled girls and boys.

BEST's goal is to nurture student interest in engineering, science, and technology. As a team, we design and build robots which we then use to compete in games designed to mirror a science reality.

In addition to robot design and construction, we also create a professional presentation, which we deliver to a panel of judges and a customized display, which we exhibit at local, regional and national competitions.

We also create a detailed team notebook which describes our design process and resulting robot. Finally, we cheer on our team and other teams at fun competition events.

Who We Are

The Woodlands Homeschoolers is a team of home-schooled females and males ranging from age 12 to 18 years old participating in BEST Robotics. We get involved in our community through the robotics demonstrations we give for schools, the fund-raising activities we hold, and the community service projects we undertake.

Our coed team is student-led. We develop valuable life skills such as teamwork, innovation, presentation and leadership as we run our "own business" with the mentorship of adult advisers to guide us along the way.

We also enjoy a variety of social activities such as game-night, movie-night and masquerade ball.
